Art Unit: 2816

1. The amendment filed on 12/31/02 has been received and entered in the case.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. The disclosure is objected to because of the following informalities: the use of the terminology "feedback" is incorrect, as noted in the previous office action. Applicants' statement that this language "is appropriate" is not persuasive because no reasons are given in their response for this assertion. Appropriate correction is required.
4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims reciting that a signal path is formed between the second node and the first node, or between the second node and the third node, are misdescriptive because no such paths are formed in the instant Fig. 4 circuitry. As shown in Fig. 4, the first node 150 gets connected to VCC when the FETs T11 and T12

Art Unit: 2816

are turned on (or FETs T13 and T14 are turned on), but node 150 is not connected to the second node 130.

5. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Shin.

To the extent applicant's circuitry includes signal paths being formed between the first, second and third paths (note the indefiniteness rejection above), in Shin the circuits 33-36 provide such paths, note Fig. 3 of the reference. These circuits also include the recited "source followers" of claims 20-28. The recited first through fourth transistors correspond to FETs MN1 through MP1, respectively; and the power supply and reference nodes are VDD and ground, respectively.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of

Art Unit: 2816

the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
